

EDULUTION IMPACT STORIES 2023

*In Zambia, 95%
of 15-year-olds
do not have basic
numeracy or literacy
skills*

*Edulution operates the
Numeracy Catch-up
Programme in 20 Learning
Centres in Zambia serving
6,000 Active Monthly Learners*

LINDA COMMUNITY SCHOOL

One of the 20 Edulution Learning Centres is located at Linda Community School.

Linda provides a safe learning environment for 3,000 children from vulnerable backgrounds.

The School is located in Chilanga District, just outside Lusaka. The area is heavily impacted by high poverty rates, unemployment, and drug abuse.

EDULUTION

In 2016, Edulution launched the Numeracy Catch-up Programme at Linda Community School, and has to date, served over 2,600 learners to gain essential numeracy and ICT skills.

Meet our heroes at Linda Community School:

MEMORY

DOREEN

PATSON

KOSHIETY

DOREEN

Headteacher Doreen Nzila started at Linda in 2015 and is proud of the excellent work Edulution is doing. Since Programme started, Linda has seen a dramatic increase in examination Pass grades: from 10% to 70%. Showing that the Learners are gaining a grip in mathematics that sets them up for their future.

“ Edulution is one of the best things to happen to our School. It has provided a foundation in mathematics that allows our children to progress into Secondary School ”

MEMORY

Memory is a PestalozziWorld alumni from the north of Zambia who found a career and her calling at Edulution. For the last seven years, she has learned several key insights that make a programme successful. One of them is the importance of fostering positive relationships within the School community - with parents, teachers and students. As it builds a vital trust between all stakeholders and gives Learners a collaborative network of support.

I feel blessed to be among the Edulution coaches that are laying a helping hand to our future leaders of Zambia. The best part of coaching is seeing learners move from dependent to self-directed.

PATSON

In 2017, Patson was a Learner at Linda but dropped out of School. Headteacher Doreen and others helped Patson return and enrolled him in the Edulution Programme.

As he learned basic numeracy skills, he started to thrive and achieved a distinction in Mathematics at the end of the year National Exam.

In 2022, Patson became an assistant Edulution Coach and in 2023, he enrolled with a full scholarship at the University of Zambia.

“ Edulution has changed my life. Without the programme, I would not be studying at University today. ”

ROSHIETY

“ My name is Roshiety, I am in Grade seven (7) at Linda Combined Community School. I joined Edulution in 2020 when I was in Grade 4. I love the Edulution sessions because I get to learn on the tablet and work with my peers. It has become easy for me to study even when I am home because our Edulution Coaches encourage us to use the tools we learn in the sessions.

When I grow up, I want to become a pilot. And I feel that Edulution will play a very important role in my future because I will be able to use the math skills I learned to measure distance and the height at which the plane is moving. I am incredibly grateful to be part of the Edulution Programme at this school. ”

EDULUTION

Since launching in 2015, Edulution has impacted over 50,000 learners.

In 2022, Edulution Zambia delivered over 1 Million Contact Hours to 8,500 Learners
